TUBI 2-in-1 Grease filler pump for Central lubrication system

TUBI Grease filler pump for Central lubrication system, 400 g LS screw-in cartridge or regular cartridge. Unit for refilling of central lubrication units from a grease cartridge. Simple handling, no need to carry buckets and so on.

Insert your grease cartridge of choice and use the lever to push the grease into the central lubrication container. Supplied for use with LS screw-in cartridges and can be easily re-built to be used with regular standard DIN1284 grease cartridges. 20 mm cylindrical connection between the filler and the adapter. Supplement with a straight or 90° adapter which is mounted on the central lubrication unit. The adapter comes in M20 x 1.5 (Beka Max and others) or M22 x 1.5 (Lincoln etc) to suit the most common units.
